

Paul Ivey and student

Fly RC Model Air Plane Club of Southbury has been working with Pomperaug High School Transportation Class in the Aviation Segment for the last 10 years. This year Caren Carpenter Transportation Teacher approached Cliff Becker (retired Biology/Chemistry teacher PHS) President of Fly RC Model Airplane Club for assistance in the project. Fly RC members who live in surrounding towns Paul Ivey, Ken Blau, MD, Bob Milanese and Ron Faanes, Ph.D. offered to help. The project was started early February, and finished with successful maiden flights of all 5 creations June 14th. The day started at Fly RC Field in Southbury with lectures by Club Members on The Academy of Model Aeronautics the governing body of the hobby, Field Safety, Principles of Aerodynamics and RC Control Functions. All students had the opportunity to fly using buddy boxes a requirement of the AMA. The day ended with hamburgers and hot dogs provided by Bryan Davis one of the students father.
